ATHARVA FOUNDATION

Website Branding Kit · Version 1.0

Brand idea

Warm, authoritative, human-centred, and inspiring. A premium editorial visual language that puts real people, community initiatives, and meaningful change at the centre. The approved palette is deep burgundy, champagne gold, and warm ivory, paired with the original multicoloured Atharva Foundation tree logo.

1. Colour palette

Colour	HEX	Usage
Primary — Deep Burgundy	#500D18	Main brand colour; primary buttons, headings on light backgrounds, key highlights.
Secondary — Dark Wine	#310A10	Footer, dark storytelling panels, image overlays.
Accent — Champagne Gold	#D9B45B	CTA buttons, icons, fine borders, emphasis; use sparingly.
Background — Warm Ivory	#F8F3E9	Main page backgrounds and spacious editorial sections.
Text — Rich Charcoal	#292321	Body copy and high-readability text.
Secondary Text — Warm Grey	#716A65	Captions, metadata, secondary descriptions.

Suggested balance: approximately 55% ivory, 30% burgundy/wine, 10% photography and dark image tones, and 5% gold accents. Treat this as a guide, not a rigid rule.

2. Typography

Role	Typeface	Usage
Headlines	**Playfair Display**	Editorial, expressive headings; use sentence case and short line lengths.
Body copy	**Inter**	Paragraphs, descriptions, forms, and general interface text.

Navigation / labels	**Inter Medium**	Navigation, buttons, category labels, and small metadata.

Typography guidance: use large, confident serif headlines with clean sans-serif body text. Keep body text readable on mobile; avoid overly tight line spacing or long all-caps paragraphs.

3. Logo rules

• **Use:** the original Atharva Foundation logo with its multicoloured tree and existing wordmark.

• **Do not:** recolour the tree, redraw the mark, add a new gold tree emblem, stretch the logo, or place it on a busy photo without a clear background.

• **Placement:** header top-left on desktop; compact top-left on mobile; footer on burgundy with adequate clear space.

• **Background:** prefer warm ivory or white behind the logo for best legibility.

4. UI components

Component	Specification
Primary button	Champagne gold fill (#D9B45B), burgundy/dark text, rounded corners, concise action label, visible hover/focus state.
Secondary button	Transparent or ivory fill, burgundy/charcoal border, dark text; use for secondary actions.
Cards	Photography-led, subtle shadow or fine border, modest corner radius, short heading and clear next action.
Botanical motifs	Use light gold/ivory line-art leaves or the foundation tree motif as subtle decoration. Never compete with photography or content.
Icons	Simple, consistent line icons in burgundy or gold; avoid mixing unrelated icon styles.
Photography	Prioritize real, approved photos from the foundation’s gallery. Use natural lighting, candid community moments, and consistent crops.

5. Layout & responsive rules

• **Desktop:** use spacious editorial grids, large photography, clear section hierarchy, and limited card repetition.

• **Mobile:** stack content vertically, keep CTAs easy to tap, use compact header/navigation, and avoid overly tall text blocks.

• **Spacing:** follow a consistent 8-point spacing scale (8, 16, 24, 32, 48, 64 px).

• **Image treatment:** rounded corners are acceptable; use subtle overlays only where text must sit on an image.

• **Accessibility:** maintain strong text contrast, visible keyboard focus, alt text for meaningful images, and descriptive button labels.

6. Recommended homepage system

#	Section	Direction
01	Hero / Mission	Original logo, mission-led headline, primary CTA, optional carousel with clear indicators.
02	Our Belief	Short statement of purpose; subtle botanical motif rather than decorative clutter.
03	Our Initiatives	Education, support for families of martyrs, women’s empowerment, and other verified initiatives.
04	Our Impact	Use only verified metrics; otherwise use qualitative impact statements.
05	Stories & Moments	Real stories, photos, captions, and clear links to fuller stories.
06	Get Involved	Support an initiative, volunteer, or partner with the foundation.
07	Closing CTA + Footer	Join the movement, foundation identity, navigation, contact, social, and legal links.

7. Content and asset rules

• Use approved, authentic photographs from the official Atharva Foundation gallery wherever possible. Generated mockup photos are placeholders only.

• Verify every impact figure, testimonial, event date, contact detail, social account, and initiative description before publishing.

• Do not invent metrics or imply that a person endorsed the foundation without permission.

• Keep crowdfunding or donation requests as one participation path; do not make every section a donation pitch.

8. Developer handoff

Treat this PDF as the visual direction for the website, not as a complete design-system specification. Before production, confirm logo files and responsive breakpoints, define hover/focus/disabled states, check mobile accessibility, and replace placeholder assets/content with verified foundation materials.

Brand summary: Original multicoloured tree logo + deep burgundy + champagne gold + warm ivory + Playfair Display + Inter + authentic, people-centred photography.
